EXPERIENCE

Full Stack Developer

Tunelink Networks Pvt Ltd

08/2024 - 08/2025 Chennai, India

- Co-developed a full-stack web application with a React.js front-end, Flask REST APIs, and MySQL backend, delivering functional modules for internal use.
- Worked mainly on the MySQL database, writing SQL queries and managing application data.
- Gained practical experience in React.js, Git/GitHub, teamwork, and time management.

Machine Learning Intern

Gradtwin OPC Pvt Ltd

08/2024 - 10/2024 Chennai, India

- Engineered an end-to-end machine-learning pipeline from data ingestion to model evaluation enabling automated predictions for records daily.
- Applied Python libraries, including Pandas and Scikit-learn, to data preprocessing and visualization.
- Improved classifier accuracy by iterative tuning and real-world testing.

PROJECTS

Data Professional Survey Dashboard

- Designed an interactive PowerBIdashboard tovisualize survey insights from 630+ data professionals across multiple roles and countries.
- Performed data cleaning and transformation using Power Query to prepare data for reliable reporting.
- Created interactive visualizations, including bar charts, treemaps, donut charts, and KPI gauges, to explore salary, job roles, and work-life balance trendsdonut charts, and KPI gauges, to explore salary, job roles, and work- life balance trends.

Loan Approval Classification

- Built a loan-approval prediction app, training classification models on financial data and achieving 92% accuracy on the validation set.
- Built and evaluated multiple classification models using preprocessing techniques and Scikit-learn pipelines to identify the best-performing model.
- Implemented an interactive Streamlit application to generate loan approval predictions using a saved model pipeline.

Bakes Web Application

- Developed a full-stack web application "Bakes" with a responsive front-end in React.js.
- Integrated Flask REST APIs for seamless connectivity with MySQL.
- Enabled dynamic content rendering and efficient database-driven functionality.

Gamified Learning App for PWD

- Built an interactive learning platform for students with disabilities.
- Integrated voice commands, keyboard navigation, and high-contrast UI.
- Used Python and PostgreSQL for tracking and gamification

Customer Spending Prediction

- Developed a regression-based application to predict customer spending using demographic, income, purchase history and shopping preference data.
- Processed a dataset of 2,000 customer records, handled missing values, and prepared numerical and categorical features for model training.
- Compared regression models using evaluation metrics, including R2, MAE, and MSE and integrated the saved model pipeline into an interactive Streamlit application.

SUMMARY

Computer Science and Engineering graduate with hands-on experience in Python, SQL, data cleaning, visualization, and machine learning. Seeking a Junior Data Analyst role to apply analytical and problem-solving skills.

EDUCATION

B.E. Computer Science and Engineering

Mohamed Sathak Engineering College

CGPA 8.25 / 10.00

2020 - 2024
Ramanathapuram, India

SKILLS

Programming Languages

Python , SQL, JavaScript , React.js

Libraries & Frameworks

Pandas , NumPy , Seaborn , Matplotlib, Scikit-learn

Technical Support

Troubleshooting, Problem Solving, Issue Analysis, Technical Documentation

Visualization Tools

Power BI, MS Excel

Version Control & Others

Git, GitHub, REST APIs, Data Cleaning & Analysis

CERTIFICATIONS

Cloud Fundamentals
IBM

ChatGPT Tools
Guvi

HTML Training
IIT Bombay

COURSES/TRAINING

Data Science
Qspiders, Chennai

VISA STATUS

Visit VISA- valid until 18/12/2026
